

ALUMINUM QUICK-PATCH

- **SELF-STICKING ALUMINUM PATCHING MATERIAL**
- **COLD APPLIED**
- **EASY AND FAST TO INSTALL**
- **STICK TO MOST SMOOTH SURFACES**
- **REFLECTIVE ALUMINUM SURFACE**
- **TOUGH AND DURABLE**

ALUMINUM QUICK-PATCH is the fastest, easiest and most economical solution to your waterproofing patch and repair problems. It is made by laminating a high-strength aluminum foil composite to a 40 mil layer of rubberized asphalt. A high-quality release paper is applied to shield the adhesive surface until the ALUMINUM QUICK-PATCH is installed.

ALUMINUM QUICK-PATCH **Self-Sticking Patching Material**

ALUMINUM QUICK-PATCH is a self-adhering, multi-purpose waterproofing material, featuring a reflective aluminum surface. Its facility for quick and easy bonding to most surfaces makes it an excellent choice for patching smooth asphalt roofs, sealing flashings, stripping metal seams, patching gutters, etc.

ALUMINUM QUICK-PATCH **Cold Applied**

No risk of fire hazards from hot tar kettles or torches. ALUMINUM QUICK-PATCH is cold applied. It requires no special tools, heat, adhesive, or fasteners.

ALUMINUM QUICK-PATCH **Easy And Fast To Install**

Use a pair of scissors or a utility knife to cut the QUICK-PATCH to desired length. Peel off release paper and stick to smooth, clean, dry surface. The patch job is finished.

Patching and repairing for waterproofing is generally a messy, complicated process . . . requiring much labor, equipment, and skill. ALUMINUM QUICK-PATCH simplifies the operation.

ALUMINUM QUICK-PATCH **Sticks To Most Smooth Surfaces**

ALUMINUM QUICK-PATCH sticks aggressively to most clean and smooth surfaces including wood, metal, masonry, existing smooth asphalt roofs, and weathered modified bitumen roofs. The surface to receive ALUMINUM QUICK-PATCH must be clean, dry and free from oil, grease, and debris.

ALUMINUM QUICK-PATCH **Reflective Aluminum Surface**

The high density aluminum alloy foil used in the manufacture of ALUMINUM QUICK-PATCH provides

a mirror-like surface to reflect sunlight. The aluminum foil, being built into the membrane, allows the Product to be used without the use of an additional coating, which saves time, labor, and money.

ALUMINUM QUICK-PATCH

Tough And Durable

ALUMINUM QUICK-PATCH is tough and durable - - puncture and abrasion resistant. It stretches to allow for building movement. Its rubberized asphalt won't crack or dry.

ALUMINUM QUICK-PATCH

Self-Sticking Aluminum Rolls

For Patch And Repair Anywhere You Want
A Fast, Dependable, Waterproof Barrier

SPECIFICATIONS

Rolls Per Case	6
Roll Length	15 cm x 10 m
Thickness	45 mils
Tear Strength	640 g
Elongation	380%
Application Temperature	15°C to 44°C
Service Temperature	-32°C to 65°C

- Waterproof/Weatherproof
- Sticks to most surfaces
- Aluminum surface reflects heat
- Low cost/Labor saving/Easy to install
- Light weight
- Tough and durable/puncture and abrasion resistant
- Stretches to allow for building movement
- Requires no coating for UV resistance

Handling Information: For safe handling of the product, read the Safety Data Sheet (SDS).
