• PLEASANT SCENT

POWER GRIT Hand Cleaner is designed for the tough Canadian climate that wreaks havoc on the hands. It is specifically engineered to remove dirt, grease and grime from tough hands that do tough jobs. Our unique formulation protects skin from drying and cracking while leaving hands smooth and clean.

POWER GRIT - Designed for the Tough Canadian Climate

While other industrial hand cleaners can separate after freezing, POWER GRIT Hand Cleaner is designed to withstand temperatures as low as -12°C. It has been tested to withstand numerous freeze/thaw cycles and still retain its lotion-like properties and great cleaning ability. No more throwing away hand cleaner because it froze.

POWER GRIT - Protects the Skin

Many of the fast-acting hand cleaners on the market cause skin to dry and crack. This is because other formulations contain solvents that clean quickly, but compromise your hands’ natural protective oils. When working in temperatures of -10°C, who wants dry, chapped hands? POWER GRIT Hand Cleaner contains a unique deep cleaning formula with raw lanolin to protect and rejuvenate skin. Using POWER GRIT Hand Cleaner regularly will prevent drying and cracking and will leave hands feeling soft and smooth.

POWER GRIT - Effective at Removing Stains

Many hand cleaning products have difficulty removing grease, asphalt or petroleum products from skin. POWER GRIT Hand Cleaner penetrates and lifts these stains and effectively cleans skin. Just place a small amount in the palm of your hand and begin to scrub; you will immediately feel the gentle cleaning action of the pumice grit present in POWER GRIT Hand Cleaner. Wipe hands clean with a rag or towel and the problem stains are removed.
POWER GRIT - Waterless

POWER GRIT Hand Cleaner is ideal for use where water is not accessible to clean soiled hands. Whether in the shop or out on the job site, POWER GRIT Hand Cleaner makes cleaning hands a breeze. It is the perfect hand cleaner for mechanics or any personnel working in the oilfield, construction, mining, forestry or farming and agriculture industries.

POWER GRIT - Has a Pleasant Scent

In most cases people that use industrial hand cleaners work in very tough environments, usually revolving around petroleum products or other materials that can leave strong odours on hands and skin. POWER GRIT Hand Cleaner was designed with this problem in mind and maintains a very pleasant scent. POWER GRIT Hand Cleaner not only leaves your hands feeling great, but will leave them smelling great as well. No one wants to leave the job site with their hands smelling like kerosene, grease or oil.

POWER GRIT - Safe

With its pH neutral properties, POWER GRIT Hand Cleaner is completely safe to use right out of the container and will not cause irritation of the skin. In addition, POWER GRIT Hand Cleaner is biodegradable and safe for the environment.
